

# I Am the Boss!

## The idea

The app will allow the user to give silly "boss-like" commands, get quirky responses, or take "boss-level" decisions. Think of it as a lighthearted app that boosts the user's confidence by simulating the experience of being a CEO or leader.

## 1 Core Features

### 1.1 Home Screen with a "Boss Button"

A large, playful button that the user presses to generate random boss-like phrases or commands. The app gives a funny, over-the-top, or empowering response like "You're in charge!" or "Delegate that task!".

### 1.2 Decision Maker

The app presents the user with random "decisions" like "Approve the budget" or "Launch the product now?". The user can select between "Yes" or "No," and the app responds with a cheeky outcome based on the choice.

### 1.3 Affirmation Generator

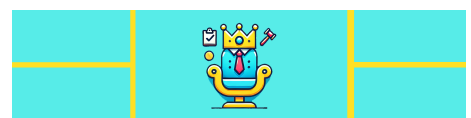

When the user needs a boost, they can get random "Boss Affirmations" like "You're the best CEO this world has ever seen!" or "Only you can make these big decisions!".

### 1.4 Delegation Simulator

Allow the user to assign "tasks" to imaginary employees with random names and fun tasks. Example: "Delegate the coffee order to Sarah," or "Tell Bob to handle the presentation."

### 1.5 Customizable Boss Persona

The user gets to input their "Boss Name" and pick a title like "CEO", "Manager", "Captain", or something fun like "Overlord.". The app addresses the user by their boss name/title throughout.

## 2 Plan

### 2.1 Home Screen (Main Page)

1. Title: "Welcome, [Boss Name]!"
2. Large button: "Give Command"
  - (a) On press, show a random "boss response" from a predefined list.

### 2.2 Random Decision Screen

1. Title: "Make a Boss Decision!"
2. A random decision prompt (like "Should we expand to Europe?" or "Is it time to give everyone a raise?").
3. Two buttons: Yes and No.
4. On tap of either button, display a funny response.
  - (a) Yes Response: "Bold move! You've got vision!"
  - (b) No Response: "Keeping it conservative, smart choice!"

### 2.3 Affirmation Screen

1. Title: "Boss Affirmations"
2. Button: Inspire Me
3. On press, show a random affirmation like "You're the head honcho!" or "Nobody commands respect like you!"

### 2.4 Delegation Screen

1. Title: "Delegate a Task"
2. A list of tasks and random employee names to assign them to (both generated from predefined lists).
3. Button: Assign Task
  - (a) On press, generate a random "employee" (e.g., "Paul," "Samantha") and task (e.g., "Prepare the presentation," "Order office supplies").

### 2.5 Boss Name Customization

1. Input field where the user can enter their "boss name" and pick a title.
2. Save the boss name and use it throughout the app ("Welcome, Boss [Name]!").

3 Screens
